EXPORT CONTROL ARTICLES

MASSACHUSETTS MAN CONVICTED OF VIOLATING U.S. SANCTIONS AGAINST IRAN

A Massachusetts man was convicted in federal court in Boston following a 14-day jury trial for charges related to a scheme to illegally export sophisticated electronic components from the United States to Iran.

JUSTICE DEPARTMENT, FBI DISABLE 13 WEBSITES BACKED BY SUSPECTED CHINESE AGENTS THAT SOUGHT SENSITIVE U.S. INFORMATION FROM SECURITY CLEARANCE HOLDERS

Thirteen internet domains used to target U.S. persons, including current and former security clearance holders with access to classified and sensitive U.S. government information, were seized by federal authorities.

CHEMICALS AND BIOLOGICALS

Some chemicals and biologicals, even those that are commonly used in the laboratory, are highly controlled under U.S. export control regulations. Whether or not these are export-controlled will depend on several factors, including amounts/mixtures used.

Two sets of regulations provide oversight for chemical and biological equipment, materials, and technology:

[Commerce Control List Chemicals and Biologicals Listing](#)

If you are using any of these agents, contact the Export Controls Office to aid you in determining whether or not your use of these agents is export-controlled and, if so, to implement the necessary controls.

FOREIGN TALENT PROGRAM

A foreign talent program is any foreign state sponsored attempt to acquire U.S.-funded scientific research through recruitment programs that target scientists, engineers, academics, researchers, and entrepreneurs of all nationalities working or educated in the United States. The Department of Energy issued an order on 7 July 2019 with fairly clear explanations of Talents programs DOE O 486.1.

Participation in such a program must be disclosed on the FCOI form, as well as any relevant forms related to any federal funding that you may be receiving, and on future federal funding proposals. Association with a Talents Program could potentially lead to ineligibility to receive Federal funding for your research.

MALIGN FOREIGN TALENT RECRUITMENT PROGRAM (MFTRP)

The federal government's definition of a MFTRP or "malign" program includes three main elements: (1) Sponsored by a "country of concern" as defined by the Secretary of State, and currently (as of January 1, 2024) includes China, North Korea, the Russian Federation, and Iran; (2) There is some form compensation or benefit (which does not have to be monetary, including the promise of a future benefit including in-kind contributions or honorary titles); and (3) Includes one of more of the problematic indicators in the federal government's definition of a "malign" talent program.

Participation in a MFTRP is prohibited for researchers applying for or receiving federal funding.
